

CoCreate® Model Manager

CoCreate Model Manager is the essential companion to 3D product development

CoCreate Model Manager manages your product design data within a central database, effectively coordinating development efforts without imposing overhead on the team.

CoCreate Model Manager is the integrated product data management companion for CoCreate Modeling. With CoCreate Model Manager, companies streamline the efforts of development teams to track and manage design data across its product lifecycle.

Key Benefits

Speed development and cut costs

Cut engineering time and drive manufacturing costs down by managing multiple product configurations with high cross-leverage and the reuse of shared parts and assemblies across product platforms.

System of record

Use CoCreate Model Manager as your centralized workgroup database, and to share released design data with other enterprise systems (such as ERP). This flexibility can support a broad range of enterprise data management strategies and systems.

Stay up-to-date with integrated CoCreate Model Manager status and revision notifications from inside the CoCreate Modeling structure browser

Data management you will not outgrow

CoCreate Model Manager scales from the global enterprise down to the one-person shop. Any size company can easily move beyond 3D CAD into an orchestrated 3D product development and lifecycle management process.

Streamline processes

Eliminate the time and expense of manual data management processes. Ensure design integrity and work with up-to-date revisions of design data across the development team with safeguards against accidental data loss.

Features and Specifications

The New Standard for Out-of-the-Box

- Relieve data management headaches with a friendly 15 minute, 6-button click installation
- Achieve the benefits that come with product data management, already pre-configured with industry best practices

Integrated Experience

- Experience the real-time, seamless product data management system inside CoCreate Modeling
- Restore your entire CoCreate Modeling design session with a single mouse-click, and immediately pick up right where you left off with revision and control and viewport settings

Manage 3D to 2D Associative Drawings

- Create fully associative 2D drawings with CoCreate Modeling, and automatically manage their 3D to 2D relationship – from design to manufacturing
- Update drawing title blocks automatically with database attributes such as revision number and change notes
- Create and save an Adobe® PDF document (with optional watermarks) with 3D models
- Add database attributes such as material properties to create multiple variations of 3D models

Bill of Materials

- Create, manage, modify, and export Bill of Materials (BOMs) from CoCreate Model Manager. Requires the add-on CoCreate BOM Editor

Workspace

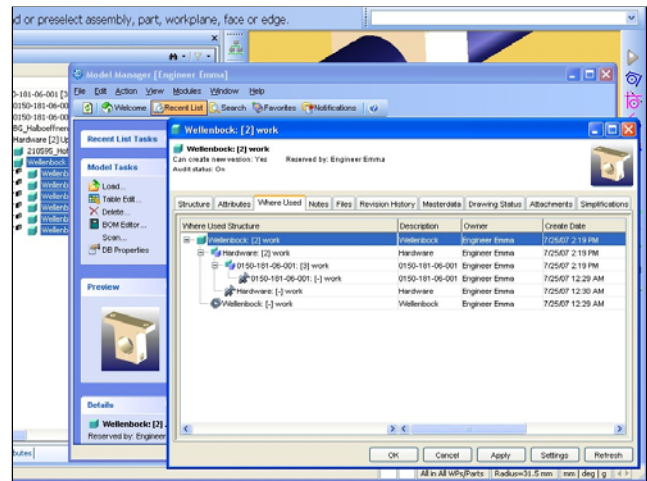

- Interact with product design data through a familiar Microsoft® Windows Explorer look and feel, including convenient access to My Recent Items, Favorites and saved Searches
- Find product design data using any defined criteria and save the search to watch it dynamically update with the latest results
- Track down products and quickly understand the effects that a single design change has on multiple product assemblies

Workflow

- Add new users to CoCreate Model Manager and easily assign permissions using pre-defined or specially configured groups
- Manage and control revision history for all your 3D design data, including non-mechanical components

Status & Notifications

- Get real-time status alerts and pop-up notifications of updates and revisions as you work in CoCreate Modeling
- Subscribe to email notification of changes to any type of product design data

Access, track, and manage model and drawing database properties with CoCreate Model Manager

Assembly Management

- Free up desktop resources when loading large, complex products
- Design within the context of your assembly structure by loading only the desired parts and assemblies

Distributed Product Development

- Improve Wide Area Network performance and support replicated databases
- Improve cross-locale support for distributed product development
- Use with single-site or multi-site implementations

Prerequisites

CoCreate Modeling

System Requirements

Supported operating systems:

- Windows Vista™ 32-bit and 64-bit Editions of Ultimate, Enterprise, and Business
- Windows® XP™ Professional 32-bit and 64-bit Editions
