

CoCreate OneSpace.net

OneSpace.net helps companies work efficiently with external suppliers by allowing them to securely exchanging engineering work packages across the Internet. Its engineering software tools enable project members to access the right version of their data and engage with team members anywhere.

Product Features

Populate project folders for rich engineering package exchange

- Publish rich product representation including product structure, BOMs, meta-data, 3D precise models, and 2D drawings
- Upload desktop files to project folders using explorer views
- Synchronize project and enterprise data using XML web services
- Automatically version files, set flexible file permissions, and keep an audit trail
- Synchronize project-related tasks between project task folders, meeting reports, and Microsoft Outlook and Lotus Notes.

Use collaboration envelopes for decision accountability

- Template-driven engineering processes and workflows
- Envelopes to link documents to team members
- Notification for team members on envelope activities
- Record decisions and activities within envelopes

Translate, visualize, and explore precise engineering data

- IGES, STEP, ACIS, DXF, and DWG import and export
- 3D model and 2D drawing measurement including dynamic sectioning, part and assembly mass, volume, and physical properties
- “What if” design alternatives exploration, including typical part modifications, assembly restructuring and positioning
- Automatic scheduling for multi-CAD format model translation
- Optional CAD converters for SolidWorks®, Solid Edge®, Inventor®, CATIA®, I-deas®, Pro/ENGINEER®, and Unigraphics®
- Support for lightweight viewing of eDrawings and XVL

Create, manage, and communicate decisions

- Capture topics, notes, tasks, decisions, and ECAD/MCAD mark-ups
- Create audit trail and meeting history as unalterable PDF and XML

Use with Microsoft Outlook and Lotus Notes

- Meeting scheduling, task assignment, subscription/change notification

Extend with Web services architecture

- Certified as a Microsoft .NET Connected application

Deploy quickly

- Standard user deployment
- Automatic update and installation of clients over the Web
- License, subscription, or hosted service options

Collaborate with these integrated tools

- Scheduling and execution for web-based meetings optimized for high-resolution engineering data
- Secure instant messaging for project teams
- Automatic project team presence detection
- Instant presence notification for user-defined project contacts
- Threaded discussions for project related topics
- Full 128bit SSL data encryption for all communications
- Integrated news feed, pre-defined engineering news channels

Ordering Information

OneSpace.net	C000
OneSpace.net Support	C000A
OneSpace.net Subscription	C000Y
OneSpace.net hosted	C080

Prerequisites

Microsoft products:

- Internet Explorer 5.5, 6.0, 7.0
- Internet Information Server 6.0 (IIS 6)
- Windows® Server™ 2003

Optional:

- Microsoft® Outlook® 2000, XP or 2003
- Lotus® Notes® 6.5

System Requirements

OneSpace.net 2006 supported platforms:

- Windows® 2000™, Service Pack 3 or above
- Windows® XP™ Professional, Service Pack 1 or above
